As a leader in Artificial Intelligence (AI) and Machine Learning (ML) fintech solutions, QuantGate is redefining trading excellence by providing traders with real-time market intelligence, for a new era of trading sophistication. We take the transactional information in the order book of over 60,000 securities, forex, futures, and crypto, classify the participants and observe their activity. Processing this data in over 5 billion calculations per second.

### TRADER PSYCHOLOGY

Our system continuously monitors the collective behaviour of participants in the market.

### PREDICTED BEHAVIOR

By quantifying the psychology behind participants' choices, we predict their next actions.

### IDEA GENERATION

Our technology seeks out and identifies prime trading opportunities across various asset classes.

### TIMING IS KEY

Timing is crucial in trading. QuantGate's products give traders the signal to decide when to get long or short in an asset.

### BROKER NEUTRAL

Our system is broker-neutral, seamlessly fitting with your current brokerage setup.

### INFORMED DECISIONS

Better timing means informed decisions. Technical analysis is too complicated for most traders.

# OUR HISTORY

 **2000**

Began as a research project with the vision of transforming the trading landscape through innovative AI technology.

 **2008**

In 2008, QuantGate Systems Inc. was officially founded, marking the commencement of our journey towards pioneering AI-driven solutions in the financial industry.

 **2018**

Over the course of a decade, we dedicated ourselves to developing and refining our proprietary AI trading technology.

 **2021**

We are now fully integrated to Interactive Brokers, Questrade, TradeStation, CQG, Sterling, and more. **Fifteen+ Years of Trading:** Our historical performance speaks volumes, trading internally has generated consistent returns.

# OUR SCIENCE

Our proprietary AI Engine is designed to decode the intricate language of the financial markets encrypted **within order flow**. We use proprietary algorithms derived from the natural sciences to predict group behavior on exchange listed securities. Our algorithms effectively analyze the following information on a per market basis:

## PERCEPTION

Market participant perceived value of the security

## COMMITMENT

Commitment of market participants based on trader intent

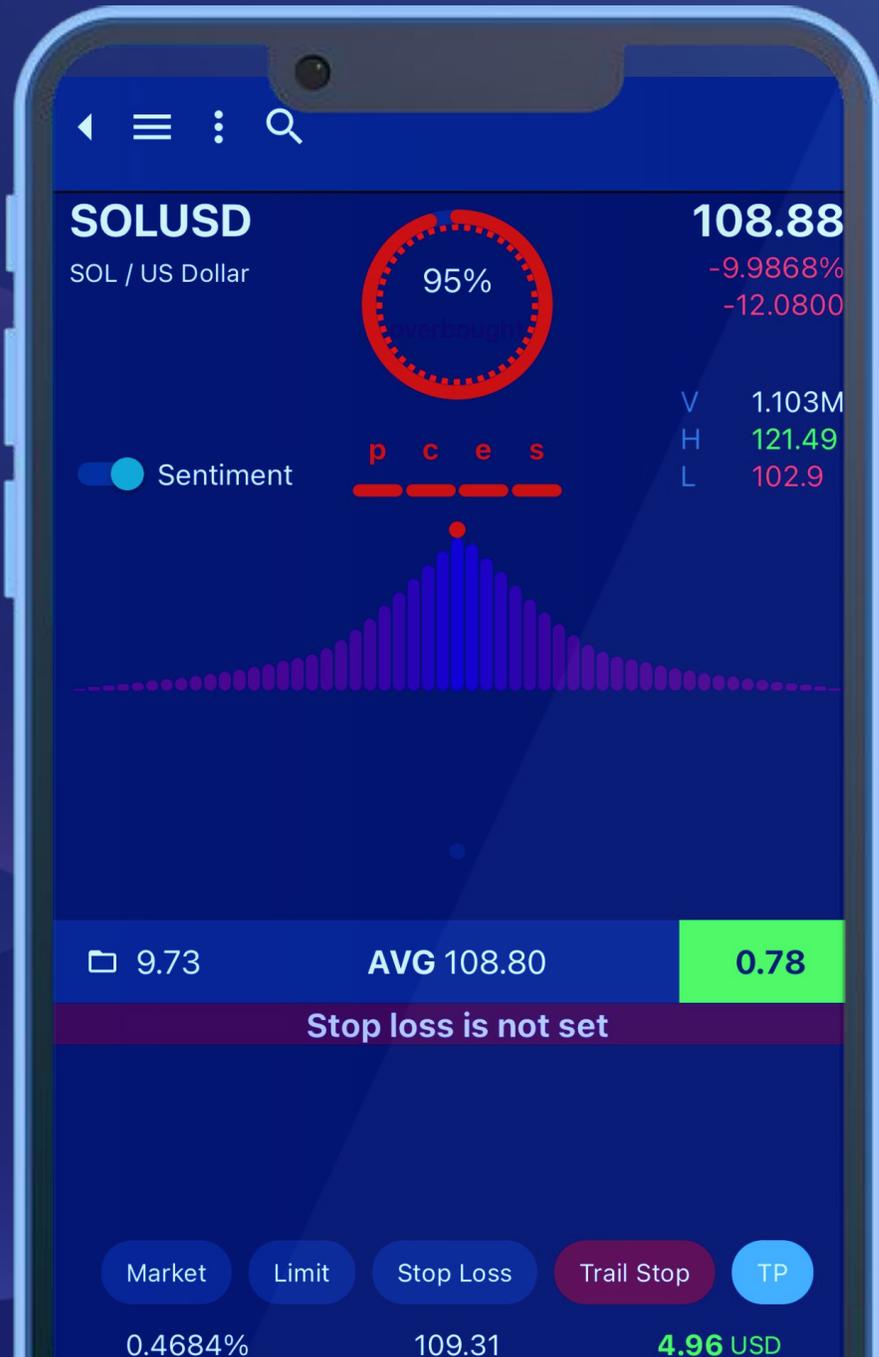

## EQUILIBRIUM

Fair market value and current trader bias

## SENTIMENT

Real time sentiment and velocity of traders
